## Welcome!

The Transportation Research Board's Urban Freight Transportation Committee (AT025) is concerned with the study and research of urban freight transportation topics and issues, including urban transportation system demand and economic relationships, right-of-way issues, pick-up and delivery needs, terminal transportation needs, institutional challenges, and new technology, with an emphasis on providing support to practitioners.

We have some exciting news to share! The TRB Urban Freight Transportation Committee has received a 2020 Blue Ribbon Award in the Research Category "for demonstrating leadership and forging successful partnerships to identify, develop, and disseminate urban research to advance TRB's Critical Issues in Transportation 2019 (Goods Movement)." The award will be presented at the 2020 TRB Annual Meeting in Washington, D.C.

Please be sure to mark your calendars for the TRB 99th Annual Meeting being held January 12-16, 2020 in Washington, D.C. Our committee is planning a number of engaging and informative activities, so please plan to be there! Be sure to view TRB Annual Meeting Interactive Program and search for "AT025" to find all of our committee activities. You can also review the session agenda to see all of our planned activities! Be sure to attend our Committee Meeting being held on Monday afternoon – view the agenda. Our special guest speaker will be [JP Ducasse](#) of USPS discussing last mile challenges. I will see you there!

In advance of the Annual Meeting, the Urban Freight Transportation Committee had an informative business meeting conference call on December 6, 2019. Please review the meeting notes under "[Meetings](#)" to review the latest before our Committee Meeting at the Annual Meeting.

In preparation for the TRB Centennial! The TRB 2020 Annual Meeting theme is *A Century of Progress: Foundation for the Future*. In celebration of the TRB Centennial, the Urban Freight Transportation Committee developed a Centennial Paper entitled [Urban Freight Transportation Committee Centennial Paper: Embracing the Future with Insights from the Past](#). As the name implies, the paper provides historical context on urban freight transportation, reflects on current challenges, offers glimpses of the future and provides a history of our committee. If you are looking for an interesting read and primer on the topic of urban freight transportation, I encourage you to read and enjoy it!

If you have not done so, I encourage you to join me in Celebrating TRB's 100th Anniversary by contributing to the TRB Century Club! More information is available on the [TRB Centennial website](#).

And remember, becoming a friend of our committee is as simple as going to [www.mytrb.org](http://www.mytrb.org), creating an account and clicking on our committee to become a friend. You will then receive my direct emails alerting you of our latest Urban Freight Transportation Committee news!

Thanks, and have a great day!
